

Suggestions for the Upcoming Training Session

1. Engagement Techniques - How to keep the children engaged throughout the session
2. Interactive Teaching Techniques: Explore ways to make the training sessions more interactive and engaging for the kids.
3. Class Management Techniques: Learn on effective class management techniques to ensure a productive and inclusive learning environment for all Digicenters example of an international school that is different curriculum and the CBC.
4. How to handle indiscipline cases (insults, noise making, unnecessary movement) in different schools.
5. Some learning aids that one can use during class time.
6. How to perfectly prepare for a class.
7. How to properly introduce a class to ensure it is well understood and that they remain engaged throughout.
8. How to make the class interesting to that child that has no interest fully to the class and needs to learn.
9. How to handle different learners in the same class, those that learn so fast and those that are a bit slow, to ensure none is feeling left out.
10. How to respectfully handle students with a lot of questions even unrelated to the actual class.
11. How to handle the silent students in class, they don't want to talk, they rarely express themselves.
12. How to perfectly give an assignment and how can i ensure they work on the assignment.
What can i actually do if the constantly do not do the assignments which actually help gauge whether they understood a concept.
13. How to plan a one hour or one and half hours class, eg. how long should one teach, how long should the activity take etc.
